November 2023 - January 2024

- Full-stack development using PHP, Laravel, PostgreSQL, Docker, AngularJs.
- Maintenance and enhancement of the Ntask system.
- Development of routes in microservices APIs.
- Bug fixing and conducting tests.

Technologies: PHP, Laravel 7, Laravel 10, PostgreSQL, Docker, Bitbucket, AngularJs.

### Systems Information Programmer - CI&T Software

May 2022 - July 2022

- Full-stack development using PHP, Drupal, Lando, Docker, MySQL, JQuery, Jenkins, GitFlow.
- Maintenance and enhancement of the Johnson & Johnson Medtech website.
- Development with Drupal 8 for new functionalities.
- Bug fixing and layout changes.
- Use of pipelines in Jenkins for publication.

Technologies: MySQL, Scrum, SQL, PHP, Drupal, Jenkins, GitFlow, Jira.

## SOCIAL

## PORTFOLIO

## RESUME

I'm a Fullstack developer focused in Backend Development with PHP in some frameworks like Laravel, Symfony, cakephp, yii2, zend, and Node.js with express.js, also i have experience in front end development with html/css/javascript and some frameworks like Vue.js and react, with experience on MySQL, MsSQL, Oracle, MongoDB, Git, Gitflow, Redis, AWS ec2 configuration, experience in some agile methodologies like Scrum and Kanban and azure devops and jira.

## EDUCATION

01/2020 - 06/2022

### College Degree

Analysis and Software development - Faculdade Estácio de Sá

## Senior PHP Developer - Meta

June 2021 - March 2022

- PHP programming using Laravel, Cakephp 3, Mysql, MongoDB, Postgresql, Node.js, React, Vue.js, Docker.
- Maintenance and enhancement of tools for Madero and the Ministry of Justice - DF.
- Development of a monitoring system for Madero's self-service kiosks.
- Creation of a node.js tool for managing menus across multiple delivery applications.
- Adaptation and enhancement of codes for the Ministry of Justice in CakePHP and Laravel.
- Bug fixing and use of pipelines in Jenkins for publication.

Technologies: MySQL, Scrum, SQL, Node.js, GitFlow, Azure DevOps, AWS Deployment, Laravel.

## Backend Programmer - Alias Tecnologia

March 6, 2021 - June 13, 2021

- Development and maintenance of the SpTaxi app using node.js, express, mongodb, redis, docker, reactjs.
- Maintenance and enhancement of functionalities of the SpTaxi API.
- Development of the usage reports page for the app using ReactJs.
- Implementation of third-party API integration for payment management.
- Changes in the API response for driver geolocation.

Technologies: MongoDB, Docker, GitFlow, Kanban, Redis.

## Backend Developer - Núcleo Produz

January 25, 2021 - March 5, 2021

- PHP programming using yii2 and mysql.
- Changes in systems for a campaign to redeem points for invoices for Brastemp and Consul with Yii 2.
- Configuration of new redemption campaigns.
- Assistance with frontend changes.

Technologies: MySQL, Yii.

## TECH STACK

- PHP, Laravel, Symfony, CakePHP, Yii2, Zend, Drupal, Wordpress.
- JavaScript, Node.js, React.js, VueJs, AJAX, jQuery.
- MySQL, MSSQL, Oracle, Postgres, MongoDB.
- HTML, CSS, Bootstrap.
- Git, GitFlow, Docker, Jenkins.
- SCRUM, Kanban.

## COURSES

- ★ DevOps - Mão na massa! - Udemy
- ★ Desenvolvimento Web Avançado com Vue (v2 e v3) e Vuex - Udemy
- ★ SCRUM Overview - Ka Solutions
- ★ Formação Node.js - Udemy
- ★ Computação em Nuvem | AWS Discovery Day - Ka Solution
- ★ Microsoft Azure Fundamentals (AZ-900) - Ka Solution
- ★ Testes unitários e TDD com PHP e PHPUnit - Udemy
- ★ Programação em linguagens HTML e Javascript - Seed Informática
- ★ Lógica de Programação - Tekno Software
- ★ Introdução a Banco de Dados Oracle - Tekno

## Backend Programmer - Econet Editora Empresarial

Software

November 4, 2019 - August 6, 2020

- PHP programming using Laravel, MySQL, and MongoDB for creating APIs.
- Development of a backend API for a taxation simulation system for CNPJ in Laravel.
- Changes in the Vue.js frontend of the taxation simulation system.
- Maintenance of the medication taxation system.
- Development of an import and verification system for invoices.

Technologies: MySQL, Git, Laravel, Vue.js.

## Backend Programmer - Cappucino Agência Digital

August 3, 2016 - November 22, 2016

- PHP and JavaScript programming using Symfony (1.4 / 2.8), jQuery.
- Development of a backend for a campaign for Risque using the Facebook API.
- Changes in the Recipes system for the Hondashi/Aji no Moto websites.
- Refactoring of the code base for agency campaigns in Symfony 2.8.

Technologies: PHP, JavaScript, MySQL, jQuery, APIs, JSON.

## **PHP Developer - Nobre Financeira**

November 23, 2015 - April 4, 2016

- Development and maintenance of a call center control and management system in PHP.
- Development and maintenance of a CRM with an integrated dialer.
- Node.js script development for WebSocket communication with the Asterisk server.
- Git version control management and code review.
- Initial Laravel code refactoring.

Technologies: PHP, MySQL, Git, jQuery, BitBucket, Composer, WebSockets, Laravel, Asterisk.

## **PHP Programmer - Work Telemarketing**

- November 10, 2015 - April 4, 2016
- Development and maintenance of systems in PHP using Symfony 2 and Zend Framework 2.
- Maintenance of a telemarketing operations report generation system in Zend.
- Development of a car recall scheduling system for Honda using Symfony.
- Initiation of system integration with a dialer.

Technologies: PHP, MySQL, Git, jQuery, BitBucket, Grunt, Composer, Symfony.

## **PHP Programmer - Trupe Agência Criativa**

March 10, 2014 - June 23, 2014

- Development of websites with HTML/CSS (Tableless) and PHP programming using the Zend framework.
- Development of institutional websites from PDF with a basic content management system.

Technologies: PHP, AJAX, jQuery, HTML, CSS.

## **PHP Programmer - Jumper Technology Company**

June 13, 2013 - September 3, 2013

- Development of websites with HTML/CSS (Tableless) and PHP programming using AJAX and jQuery.
- Development of a portal with backend content management in PHP and its database.

Technologies: JavaScript, HTML, CSS.

## **Developer I - Resource IT Solutions**

September 12, 2011 - August 22, 2012

- Creation and modification of web pages for the Santander bank portal and intranet.
- Management of content changes for the Santander bank's intranet and website, formatting in HTML and CSS, and publishing via SVN.

Technologies: JavaScript, HTML, CSS.

## **Junior PHP Developer - Datto**

March 20, 2011 - May 10, 2011

- Web systems development with PHP (object-oriented), AJAX, jQuery, and MySQL.
- Development of CRM and web-based inventory control systems with Zend.

Technologies: PHP, MySQL, AJAX, jQuery.

## **Creation Assistant - Cyber1 do Brasil**

February 1, 2011 - March 17, 2011

- Development of web pages in HTML, CSS, Javascript with PHP (structured) programming and MySQL database.
- Development of a group buying website focused on the gastronomic sector, integrated with a payment system.

Technologies: PHP, MySQL, JavaScript, HTML, CSS.

## **Programmer - Estúdio 23**

March 23, 2008 - August 17, 2008

- Development of web pages in HTML, CSS, Javascript with PHP (structured) programming and MySQL database.
- Creation of the frontend for the FUNfest festival website.
- Development of Flash banners with ActionScript.
- Full frontend and backend development for the CAD 2008 website.

Technologies: PHP, MySQL, JavaScript, HTML, CSS.

## **Junior Programmer - SCHK Sistemas**

February 1, 2001 - December 1, 2003

- Coding and validation of computer programs for e-commerce using programming tools (Photoshop, Javascript, HTML, Flash, and Actionscript) and database access (SQL Server).
- Testing and validation of CRM system forms in Javascript.

Technologies: SQL Server, JavaScript, HTML, CSS.
